

March 26, 2010

WASHINGTON, DC - U.S. Rep. Michael A. Arcuri (NY-24) announced today that the Federal Aviation Administration (FAA) has awarded the Finger Lakes Regional Airport \$190,000 to update the airport's master plan.

"I am pleased to announce this grant which will enable Finger Lakes Regional Airport to perform an airport master plan update," **said Arcuri, a member of the House Transportation and Infrastructure Committee which is responsible for authorizing funds through the FAA** . "These funds will help the airport to continue serving as a point of growth and development in the region. I am glad to see federal funds coming back to the area to improve transportation infrastructure."

This update will provide new aviation forecasts and facility requirements, as well as an updated plan that depicts current airport design standards. The current airport layout plan was approved in May 1989, and is outdated.
